DigiPae

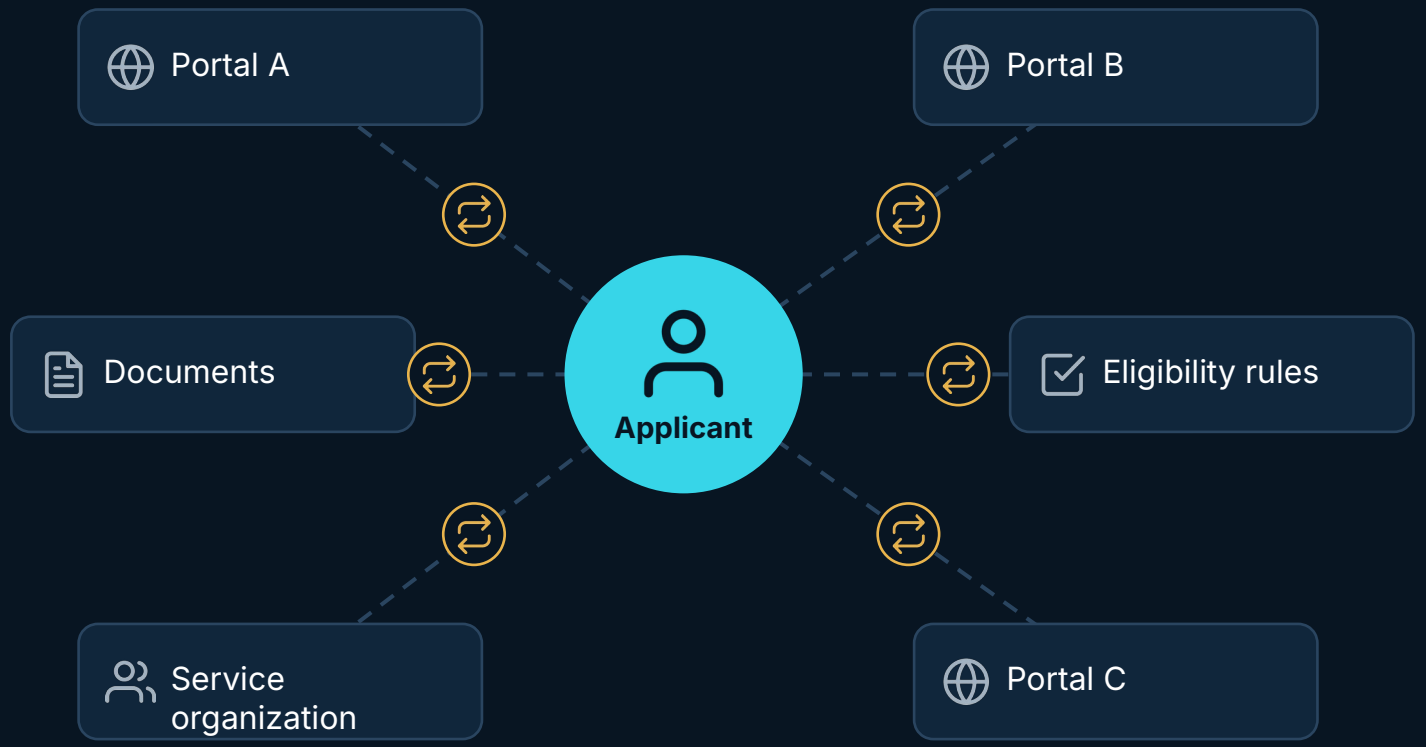

The Connectivity Layer for Government Services

Simplifying government document access, eligibility workflows, and verification through consent-based infrastructure.

Pre-seed · 2026 digipae.com Operated by CEIVIS LLC

Government Services Are Connected by Paperwork, Not Infrastructure

Many portals, different rules

Each program has its own site, account, and eligibility logic.

The same facts, entered again

Identity, address, income, and household details are re-collected per program.

Documents handled by hand

Records are found, uploaded, and checked manually — by applicants and caseworkers.

Fragmentation Creates Friction for Everyone

Individuals

≈ 2 in 3

Medicaid disenrollments in the final month of the 2023–24 unwinding were for procedural or paperwork reasons — not a finding of ineligibility.

KFF, 2024

Organizations

Similar data

Federally funded benefit programs require similar types of information about individuals to determine eligibility — gathered program by program.

GAO/HEHS-00-119

Agencies & the public

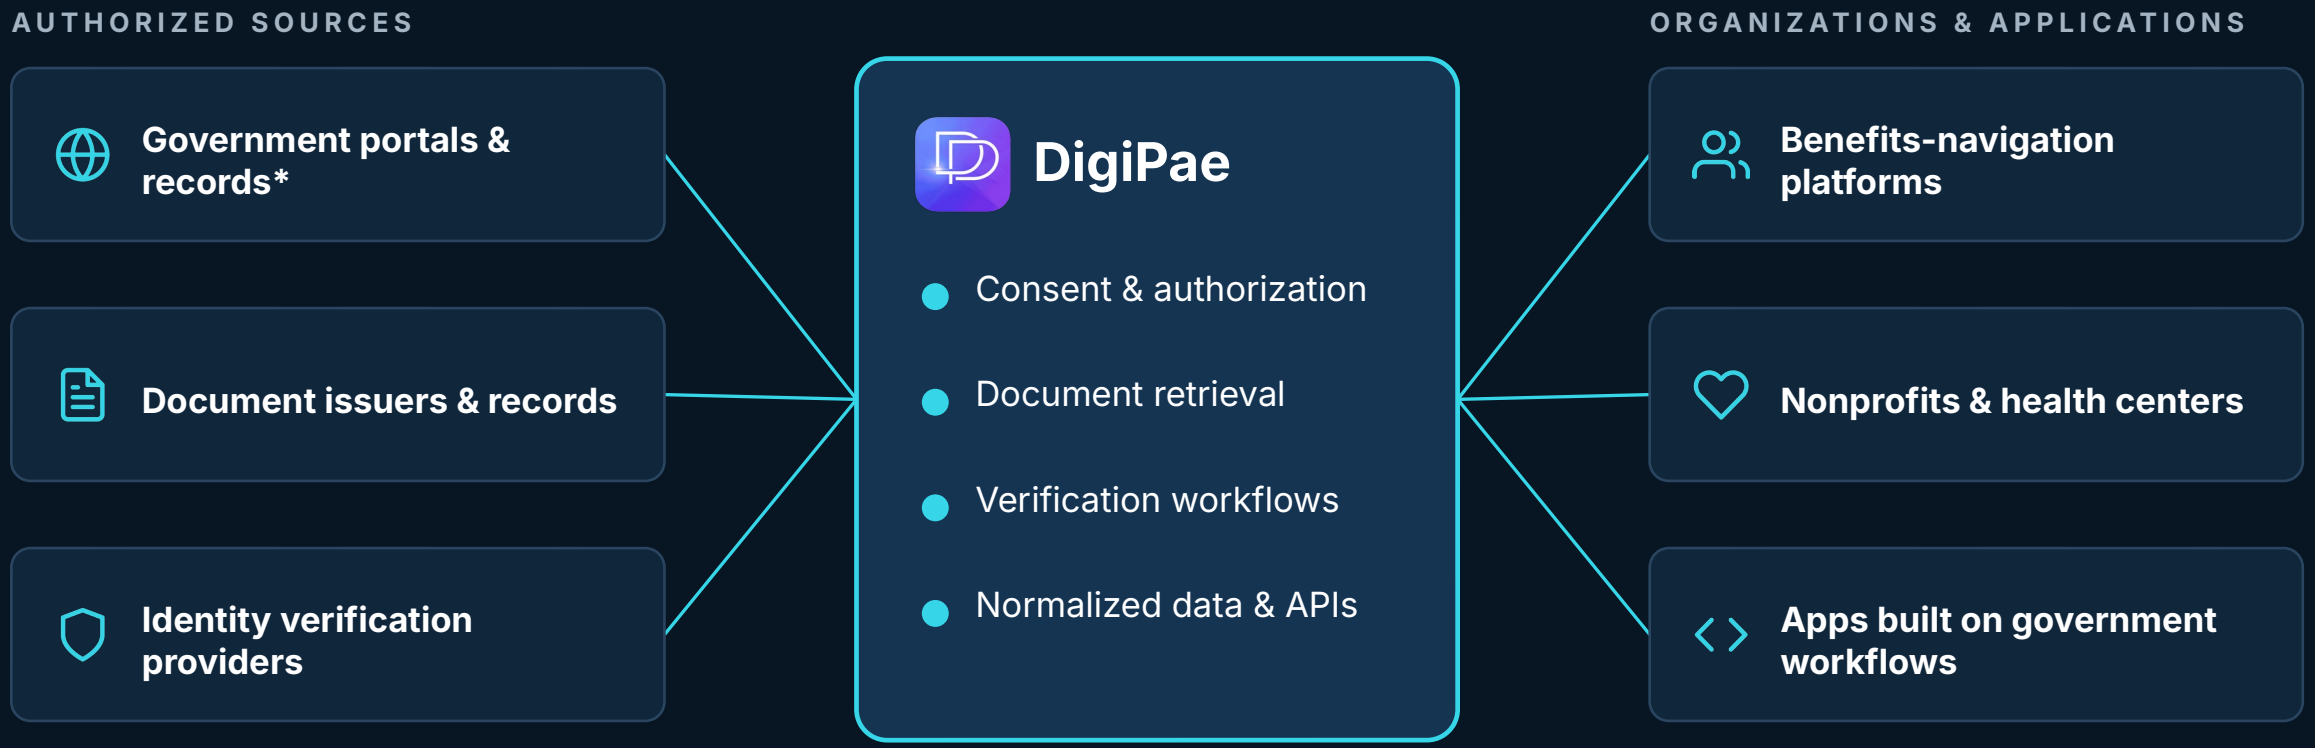

10.5B hours

Estimated public burden from federal information collections in FY2023 — forms, records, and verification across government.

OMB FY2023, via CEI

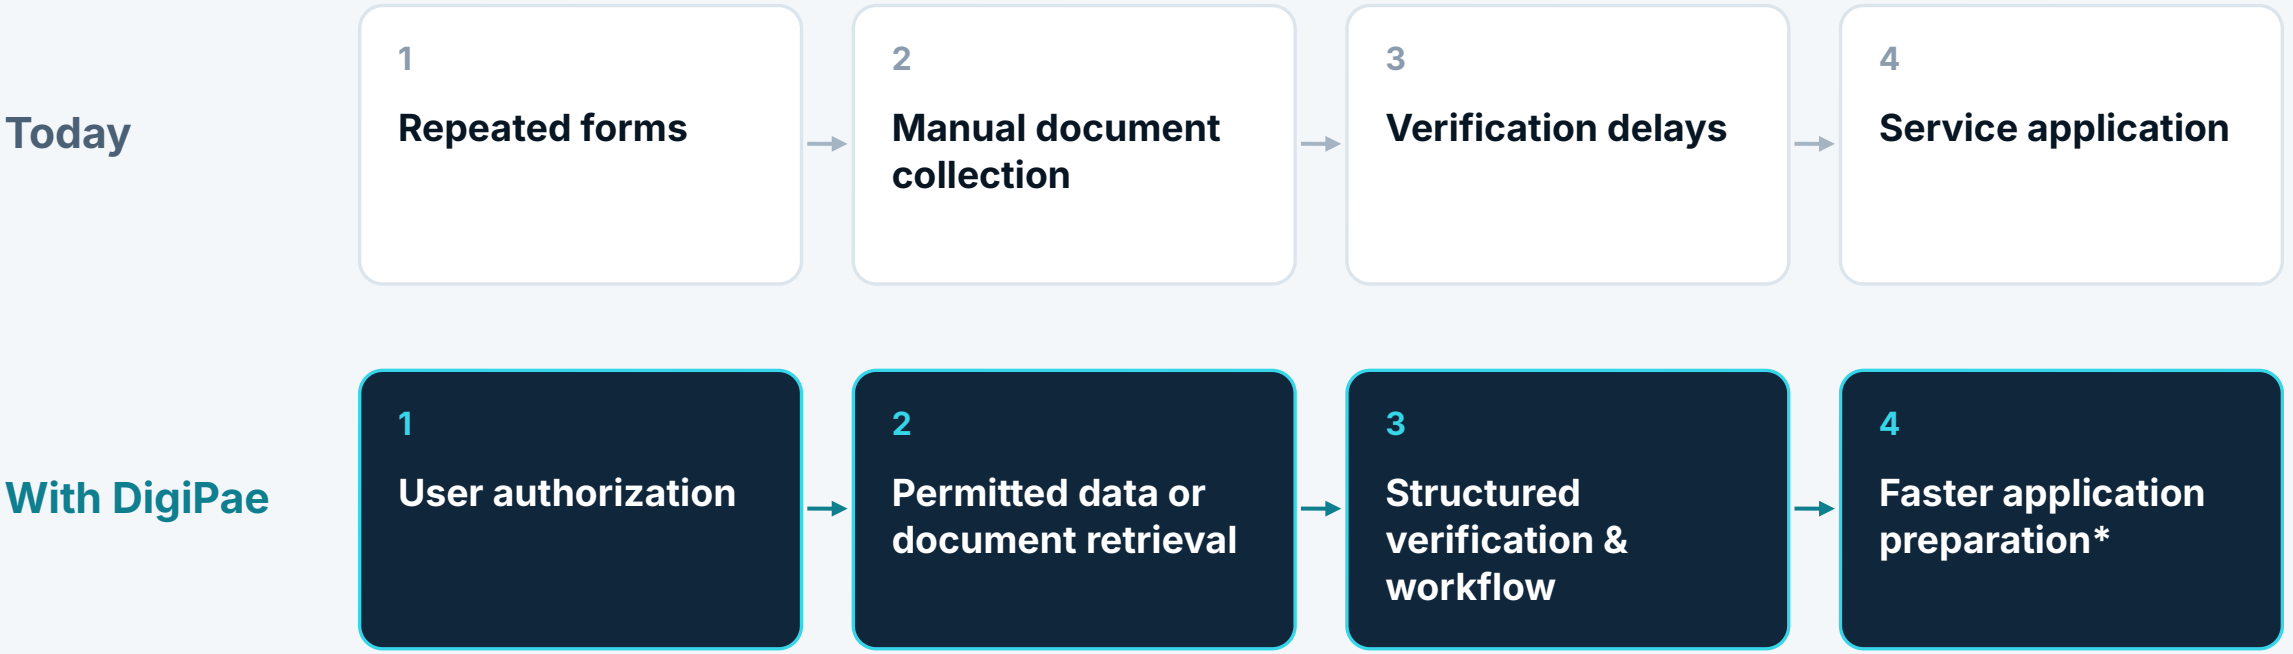

Reach also remains incomplete: WIC served an estimated 53.5% of eligible people in 2022 (USDA FNS). Full citations in the appendix.

One Consent-Based Connection. Multiple Government Workflows.

* Only where access is legally permitted and an integration path exists. A user's consent alone does not create a right to access government data.

From Repeated Applications to Reusable Information

* Intended benefit, not a measured result. Time saved and completion rates will be measured with design partners before any claim is made.

One Integration for Documents, Verification, and Eligibility

Status as reported by the founding team — to confirm before external use. No live government integrations today.

DigiPae platform
one integration for customers

- **Consent & authorization management** — PROTOTYPE
- **Document retrieval & processing** — PROTOTYPE
- **Identity verification integration** — IN DEVELOPMENT
- **Audit logs, access control & security** — IN DEVELOPMENT
- **Data normalization** — PLANNED
- **Eligibility workflow support** — IN DEVELOPMENT
- **Developer APIs & webhooks** — PLANNED

Start With Benefits. Expand Into Government Connectivity.

1 START

Benefits workflows

- Benefits-technology providers
- Navigation & nonprofit assistance organizations

Use case: reduce repeated document collection and manual case preparation.

→

2 EXPAND

Health & social services

- Community health centers
- Medicaid health plans
- Community action agencies

Same consent, document, and verification layer — new customer segments.

→

3 EXTEND

Adjacent workflows

- Other regulated and government-service workflows

Only where verified integration paths and customer demand exist.

Proposed motion Founder-led design partnerships → paid pilots → developer self-serve onboarding

Developer-First Infrastructure With Recurring Revenue Potential

Usage-based API

Priced per authorized retrieval or verification call.

Platform subscription

Monthly platform fee by tier, with included usage.

Enterprise integration

Annual contracts for custom workflows, security, and support.

ILLUSTRATIVE PRICING ARCHITECTURE

	Starter	Growth	Enterprise
Typical customer	Small nonprofit or pilot team	Benefits-tech platform	Health plan or multi-site network
Platform fee	*$ / month — to confirm*	*$ / month — to confirm*	*Annual contract — to confirm*
Usage	Included calls, then per call	Volume-tiered per call	Committed volume
Support & security	Standard	Priority	Custom integration, review & SLA

Illustrative structure only. DigiPae has no published pricing, contracted customers, or revenue to date.

The Opportunity Extends Beyond Benefits

Segment (US)	Orgs	Count source	ACV*	TAM
Community health centers	1,359	HRSA UDS, 2024	$24K	**$32.6M**
Medicaid health plans (MCOs)	291	KFF, Jul 2024	$150K	**$43.7M**
Community action agencies	~1,000	Comm. Action Partnership	$12K	**$12.0M**
211 referral agencies	200+	211.org	$12K	**$2.4M**
LSC legal aid programs	131	LSC, 2023	$12K	**$1.6M**
Benefits-tech platforms	*To confirm*	Customer research	*To confirm*	*To confirm*

* ACVs are illustrative assumptions to validate in customer discovery, not observed prices. Beyond benefits, adjacent regulated and government-service workflows are not yet sized.

TAM **$92M**

Identified initial segments × illustrative ACV

SAM **$49M**

Nonprofit, community & health-center segments (2,690 orgs)

SOM **$0.9M ARR**

50 customers in 36 months × $18K blended ACV (assumption)

Bottom-up: TAM = segment organizations × ACV · SAM = reachable initial scope × ACV · SOM = obtainable customers × ACV. Calculation detail in the appendix.

DigiPae Is Building the Connectivity Layer

Category	Examples	Documented focus
Digital identity	Login.gov (GSA), ID.me	Sign-in and identity verification for government services
Identity verification	Socure, Persona	Identity verification for businesses and platforms
Income & employment verification	Equifax The Work Number, Truv	Income and employment verification, including for benefits eligibility
Benefits technology	Propel, Code for America	Consumer benefits tools; government-partnered benefits services
Government digital services	Nava PBC	Builds digital services for government agencies
Data connectivity	Plaid	Consumer-permissioned connectivity to financial accounts
DigiPae (proposed)	Infrastructure for organizations	**Consent-based connectivity for government documents and eligibility workflows, delivered as developer APIs**

Focus descriptions summarize each company's public materials; they are not claims about what these companies lack. Several are potential partners rather than competitors.

Building the Infrastructure, Validating the Demand

Done

- DigiPae brand, product design, and app prototype screens
- Earlier digital-payments exploration (now secondary)
- Product positioning and launch content

In progress

- Identity verification integration
- Government benefits product development
- Staging environment and prototype
- Customer discovery and outreach

Next 6–12 months

- Design-partner agreements (target: to confirm)
- First permitted data-source integration
- Security and privacy baseline
- Paid pilot with defined success metrics

TRACTION — TO CONFIRM

[#]	[#]	[#]	[#]
Discovery conversations	Design partners / LOIs	Prototype users	Waitlist sign-ups

Building the Team for Government Connectivity

Lochan Reddy

Founder · role to confirm

Relevant technical and business experience — to confirm

[Cofounder name]

Cofounder · role to confirm

Relevant experience — to confirm

Why this team

- Firsthand view of repeated documentation and verification friction — to confirm with the founders' own story
- Has already shipped DigiPae brand, product design, and prototype work

Planned hires & advisers

- Founding engineer — integrations & security
- Privacy & compliance adviser
- Government benefits policy adviser

Making Government Services Easier to Access and Integrate

“Government services should be easier to connect to, easier to navigate, and easier to build upon.”

Near-term milestones

- Sign design partners in benefits workflows
- Ship the first permitted integration
- Run a measured pilot
- Security and privacy baseline

The ask

- Raising: $[amount] pre-seed — to confirm
- Instrument: to confirm
- Runway target: [months] — to confirm

Use of funds

- Engineering & integrations — [%]
- Security & compliance — [%]
- Design partners & go-to-market — [%]

APPENDIX A · SOURCES

Sources Behind the Problem and Market Slides

Source	Title / data point	URL
KFF (2024)	How Did Medicaid Renewal Outcomes Change During the Unwinding?	kff.org/medicaid/how-did-medicaid-renewal-outcomes-change-during-the-unwinding
GAO (2000)	Benefit and Loan Programs: Improved Data Sharing Could Enhance Program Integrity (GAO/HEHS-00-119)	gao.gov/products/hehs-00-119
GAO (2021)	Federal Low-Income Programs: verification of beneficiary information (GAO-21-183)	gao.gov/products/GAO-21-183
OMB via CEI (2023)	FY2023 federal paperwork burden of 10.5 billion hours, as reported from OMB's annual burden report	cei.org/blog/from-cuts-to-costs-why-federal-paperwork-keeps-piling-up
USDA FNS (2022)	National and State-Level Estimates of WIC Eligibility and Program Reach	fns.usda.gov/research/wic/eer/2022
HRSA (2024)	Uniform Data System — national health center data (1,359 reporting awardees)	data.hrsa.gov/topics/healthcenters/uds/overview/national
KFF (Jul 2024)	Total Medicaid MCOs — state health facts (291 nationally)	kff.org/medicaid/state-indicator/total-medicaid-mcos
Community Action Partnership	National network of about 1,000 community action agencies	communityactionpartnership.com
211.org	About 211 — more than 200 agencies nationwide	211.org/about-us
LSC (2023)	LSC By the Numbers — 131 funded legal aid organizations	lsc.gov

APPENDIX B · MARKET ASSUMPTIONS

How the Bottom-Up Market Estimate Is Built

Layer	Formula	Inputs	Result
TAM	Σ segment orgs × segment ACV	1,359 × $24K + 291 × $150K + 1,000 × $12K + 200 × $12K + 131 × $12K	**$92.2M**
SAM	Initial-scope orgs × ACV	Health centers, community action, 211, legal aid (2,690 orgs); excludes Medicaid plans (longer sales cycles)	**$48.6M**
SOM	Obtainable customers × blended ACV	50 customers within 36 months × $18K blended ACV (assumption, to validate)	**$0.9M ARR**

- ACVs ($12K community nonprofits, $24K health centers, $150K Medicaid plans) are planning assumptions, not observed prices. Replace them with discovery data.
- Counts are national (US) and dated as cited; benefits-technology platforms are not yet counted.
- Adjacent regulated and government-service workflows are excluded until integration paths and demand are verified.
