DigiPae

The Connectivity Layer for Government Services

Simplifying government document access, eligibility workflows, and verification through consent-based infrastructure.

Pre-seed · 2026 digipae.com Operated by CEIVIS LLC

Fragmentation Creates Friction for Everyone

Individuals

≈ 2 in 3

Medicaid disenrollments in the final month of the 2023–24 unwinding were for procedural or paperwork reasons — not a finding of ineligibility.

KFF, 2024

Organizations

Similar data

Federally funded benefit programs require similar types of information about individuals to determine eligibility — gathered program by program.

GAO/HEHS-00-119

Agencies & the public

10.5B hours

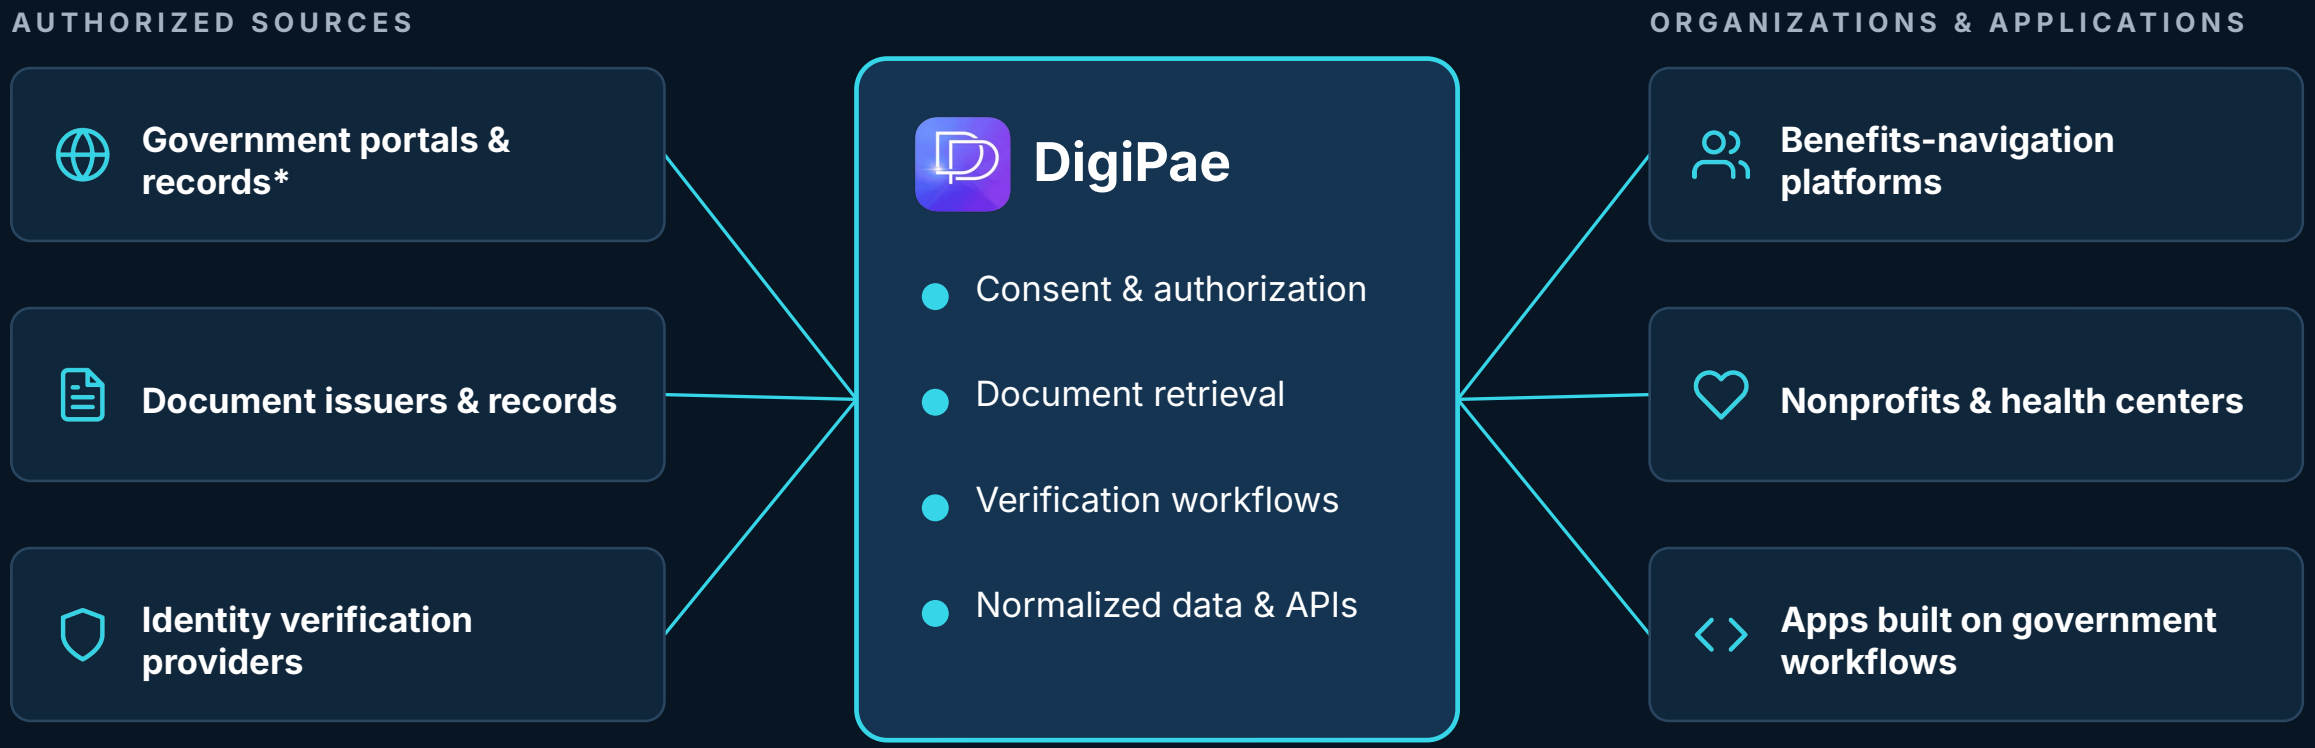

Estimated public burden from federal information collections in FY2023 — forms, records, and verification across government.

OMB FY2023, via CEI

Reach also remains incomplete: WIC served an estimated 53.5% of eligible people in 2022 (USDA FNS). Full citations in the appendix.

02 · SOLUTION

One Consent-Based Connection. Multiple Government Workflows.

* Only where access is legally permitted and an integration path exists. A user's consent alone does not create a right to access government data.

Building the Infrastructure, Validating the Demand

Done

- DigiPae brand, product design, and app prototype screens
- Earlier digital-payments exploration (now secondary)
- Product positioning and launch content

In progress

- Identity verification integration
- Government benefits product development
- Staging environment and prototype
- Customer discovery and outreach

Next 6–12 months

- Design-partner agreements (target: to confirm)
- First permitted data-source integration
- Security and privacy baseline
- Paid pilot with defined success metrics

TRACTION — TO CONFIRM

[#]	[#]	[#]	[#]
Discovery conversations	Design partners / LOIs	Prototype users	Waitlist sign-ups

The Opportunity Extends Beyond Benefits

Segment (US)	Orgs	Count source	ACV*	TAM
Community health centers	1,359	HRSA UDS, 2024	$24K	**$32.6M**
Medicaid health plans (MCOs)	291	KFF, Jul 2024	$150K	**$43.7M**
Community action agencies	~1,000	Comm. Action Partnership	$12K	**$12.0M**
211 referral agencies	200+	211.org	$12K	**$2.4M**
LSC legal aid programs	131	LSC, 2023	$12K	**$1.6M**
Benefits-tech platforms	*To confirm*	Customer research	*To confirm*	*To confirm*

* ACVs are illustrative assumptions to validate in customer discovery, not observed prices. Beyond benefits, adjacent regulated and government-service workflows are not yet sized.

TAM **$92M**

Identified initial segments × illustrative ACV

SAM **$49M**

Nonprofit, community & health-center segments (2,690 orgs)

SOM **$0.9M ARR**

50 customers in 36 months × $18K blended ACV (assumption)

Bottom-up: TAM = segment organizations × ACV · SAM = reachable initial scope × ACV · SOM = obtainable customers × ACV. Calculation detail in the appendix.

Building the Team for Government Connectivity

Lochan Reddy

Founder · role to confirm

Relevant technical and business experience — to confirm

[Cofounder name]

Cofounder · role to confirm

Relevant experience — to confirm

Why this team

- Firsthand view of repeated documentation and verification friction — to confirm with the founders' own story
- Has already shipped DigiPae brand, product design, and prototype work

Planned hires & advisers

- Founding engineer — integrations & security
- Privacy & compliance adviser
- Government benefits policy adviser

06 · ASK

Making Government Services Easier to Access and Integrate

“Government services should be easier to connect to, easier to navigate, and easier to build upon.”

Near-term milestones

- Sign design partners in benefits workflows
- Ship the first permitted integration
- Run a measured pilot
- Security and privacy baseline

The ask

- Raising: $[amount] pre-seed — to confirm
- Instrument: to confirm
- Runway target: [months] — to confirm

Use of funds

- Engineering & integrations — [%]
- Security & compliance — [%]
- Design partners & go-to-market — [%]
